5.4 IR Pin Definition

IR Receiver and Blaster pin's definition as below:

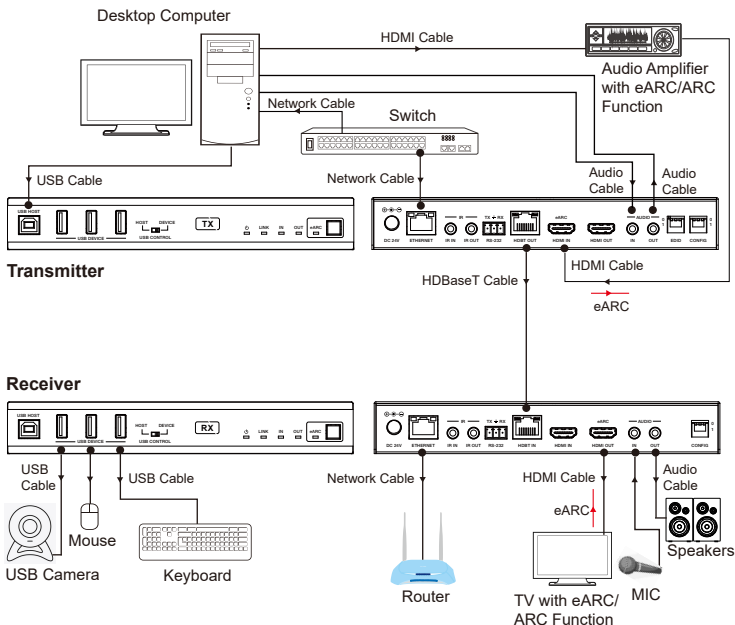

Note: When the angle between the IR receiver and the remote control is $\pm 45^\circ$, the transmission distance is 0-5 meters; when the angle between the IR receiver and the remote control is $\pm 90^\circ$, the transmission distance is 0-8 meters.

6. Application Example

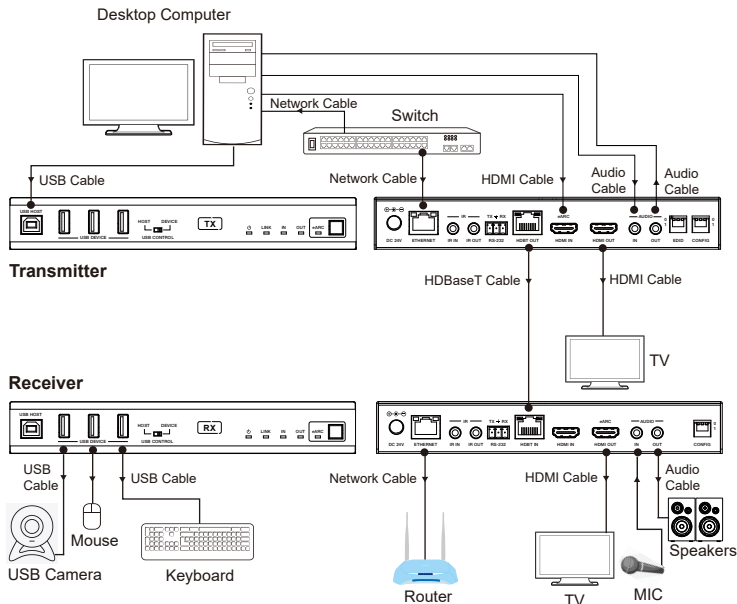

Mode 1: eARC/ARC Application

The Audio Return Channel (ARC) in HDMI 2.1 enables a TV, via a single HDMI cable or audio cable, to send audio data “upstream” to an A/V receiver, the extender will continue the upstream audio all the way to the transmitter. There it can be connected via HDMI ARC.

Note: Please press the eARC buttons on the front panel of the transmitter and receiver to enable the eARC/ARC function before operating the system.

Mode 2: Ordinary Connection Application

Note: Please press the eARC buttons on the front panel of the transmitter and receiver to disable the eARC/ARC function before operating the system.
